DETAILED ACTION

Response to Amendments

Applicant's terminal Disclaimer filed on 4/23/04 has been considered, approved and entered. As a result, the instant application is in allowance condition.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 1-34 are allowable.

The following is an examiner's statement of reasons for allowance: Claims 1-34 are allowed over the prior art of record. The prior art fail to teach or suggest an apparatus and method for an analog to digital converter that that a comparator comprising a multiplexor coupled to a plurality of differential pairs, each differential pair coupled to a respective one of said plurality of analog input signals, and the multiplexor selecting one of said plurality of differential pairs based on said plurality of input select signals; and a latch having a first input terminal coupled to receive an output signal said comparator, the latch having a data input terminal coupled to receive a series of binary signals; an output signal said comparator controlling when said latch provides an output signal corresponding to a binary signal applied to said data input terminal, wherein said comparator compares said first signal with a selected one of the plurality of analog input

signals to generate the output signal, and the latch provides one or more bits of an N-bit digital code representing said selected one of said plurality of analog input signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

The prior art made of record and not relied upon is considered pertinent to application's disclosure. The cited references relate to symmetrical analog to digital converter.
